### TIPS FOR PIPE SMOKING

**NEVER USE A TORCH LIGHTER ON YOUR PIPE!** Instead, use a "soft" flame like a match or zippo.

**When packing your pipe:**

Gravity feed tobacco into the pipe three times.

1st time pack with the touch of a child.

2nd time pack with the touch of a woman.

3rd time pack with the touch of a man.

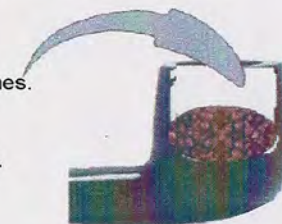

leaving a slight spring.

**Now it's time to light up.**

When a flame is applied, tobacco will rise gently... After you thoroughly light the first time ("toasting" the tobacco), gently tamp the tobacco and puff at the same time. Now relight - this will be the "true" light and the tobacco will start burning. Periodically tamp the tobacco to stay lit.

**Pipe cleaners are your pipe's best friend!**

After smoking, run a pipe cleaner through the stem of your pipe and all the way to the bottom of the bowl. This removes the excess moisture and your pipe will be ready for your next smoke. B.J. Long's' cotton pipe cleaners are the best!
